

CRGC

Silver Mountain Electronic Targets Connection Procedure

A battery powered Wi-Fi enabled device with a web browser is required, However the operating system does not matter (Android, iOS, Mac & Windows)

1. Navigate to the **connection/Wi-Fi Settings** on your device. (on a mobile device running Android or iOS this is most likely represented by a cog/gear symbol.)
2. Connect to the **SilverMountainTargets** network – no password is required.
3. Open your web browser of choice. (any browser should work)
4. Locate the **address bar** at the top of your browser where you would normally enter a web address.
5. In said **address bar** enter the following IP address **192.168.0.47** then hit enter on your keyboard/keypad to load the page.

6. You should now be able to see the target scoring pages and be able to see all three lanes.
7. Select the appropriate lane you wish to view/shoot on at the bottom of your screen by **clicking/tapping** on the appropriate box - they are labelled **T1/54**, **T2/55** & **T3/56**.
